

PodRunner™ Delivers Your Payload with Hitch 'n' Roll Mobility™

All PodRunners™ are easy to roll and are narrow enough to fit through doorways, making them versatile both indoors and out.

Scissor lift chassis enables one person to easily mount the PodRunner™ on any 2" trailer hitch without lifting.

Wheels are suspended off the ground during transport, so there are no speed restrictions or licensing fees.

✓ Mounts on any 2" trailer hitch

Universal hitch adapter works with standard 2" trailer hitch. No vehicle modifications required.

We make a PodRunner™ for every purpose: FireFighter-Pods™, Cargo-Pods™, Workstation-Pods™ with optional generator compartment, Command & Communication pods, SCBA carriers, Dive & Boat and more.

The PodRunner™ portable delivery system consists of a fully customizable payload (the “pod”) securely attached to a scissor-lift chassis with all-terrain tires (the “runner”). The PodRunner™ mounts on any standard 2” trailer hitch, and the scissor-lift chassis enables one person to easily raise and lower the unit from the hitch without lifting—and then roll it to the destination.

Cargo-Pod™ Starting at \$2995

Load up to 400 lbs. of gear and equipment into 18 cubic feet of secure and mobile storage. Without lifting the Cargo-Pod™, one person can easily mount it to the vehicle's hitch for transport, then roll it like a cart to wherever it is needed. Because it is narrow enough for standard doorways, the Cargo-Pod™ can deliver your stuff almost anywhere. Optional inserts are available to assist with organization and accessibility.

- Optional accessories include brackets, dividers, equipment cages and drain plugs
- Lockable, weather resistant top loading design is made from lightweight, durable aluminum
- 18 cubic feet of storage space can hold up to 400 lbs. of cargo
- Compact for storage – easily tucks into a garage, storage room, or apparatus bay until needed
- Custom color and graphics options

Cargo-Pod™

Workstation-Pod™ Starting at \$4295

A completely customizable, portable workspace for anyone in the field or with multiple work sites. Interior configuration options include rack mounts for radios and electronics, adjustable shelves and drawers, as well as power and charging stations. With its all-terrain tires and narrow design, the Workstation-Pod™ works seamlessly indoors and out. Optional generator compartment enables this unit to be independently powered for remote locations or disaster response.

- Customizable interiors incorporate all the conveniences of an office on the go
- Lockable, weather resistant clamshell design made from lightweight, durable aluminum
- Optional locking generator compartment to prevent pilferage
- Multiple power options allows you to plug into wall power, a generator or utilize batteries
- Scissor lift chassis allows for adjustable work heights
- Optional rack mount cage gives you standardized after-market customization
- Turnkey command and communication models available
- Custom color and graphics options

Workstation-Pod™ shown empty (above) and with Communication Configuration (left)

Hydrant-Pod™ Starting at \$4995

Hydrant-Pod™ enables first responders to draft from hard-to-access water sources to fill engines or water tenders in minutes. It turns swimming pools, ponds or irrigation canals into essential water support without hydrants—or where pressurized hydrants have been disabled due to wildfire or natural disaster.

- Set up a drafting resource in less than 5 minutes to nearly any water source
- Can be delivered by any vehicle with a 2” trailer hitch (Chief's SUV, Utility Truck, Volunteer FF)
- Compact for storage – easily tucks into a garage, club house, pool shed or Apparatus Bay
- Excellent HOA investment for neighborhood fire preparedness
- Can also be used for irrigation or de-watering flooded areas
- Pump is easily removed for stand-alone operation

Hydrant-Pod™

Runner Starting at \$2495

If one of our standard enclosures doesn't meet your needs, we can outfit the Runner (chassis) with a platform for universal mounting of generators, compressors, specialty tools, lighting or equipment. We can also offer tool chests and other custom configurations. The Runner is capable of holding up to 500 lbs. of equipment.

Ready to Go Anytime, Anywhere

The PodRunner™ “pod” is securely mounted on a heavy-duty, scissor-lift chassis (the “runner”), with solid, urethane “never flat” tires and easy steer T-handle. Narrow and compact, the PodRunner™ fits through standard doorways and can be stored almost anywhere: a storage shed, garage or apparatus bay.

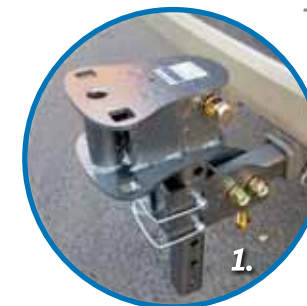

One Person — Hundreds of Pounds of Gear — NO LIFTING

Roll the fully loaded PodRunner™ to the back of your vehicle. The hitch adapter (included) turns any standard 2” trailer hitch from a horizontal to a vertical mount. Cranking the handle raises the runner (chassis) up to align with the hitch adapter. Once engaged on the hitch, turning the crank handle in the other direction lifts the wheels off the ground. The handle locks for transport. You're ready to go!

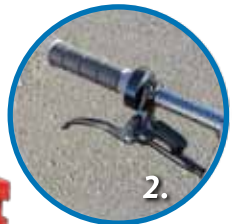

No Speed, Road or Licensing Restrictions

Because the PodRunner™ wheels pull up for transport, you don't have the speed, road or licensing restrictions of a traditional trailer. Emergency responders can drive Code 3 and anyone can take the PodRunner™ over rough terrain. Upon reaching your destination, simply reverse the process with the crank and roll your PodRunner™ anywhere it's needed. All PodRunner™ models are narrow enough to fit through doorways and into elevators and the rugged chassis design easily handles uneven or unpaved terrain.

Custom color, branding and vinyl applications available. Call for more info.

1. Adjustable universal Hitch Adapter is included and works with any standard 2” trailer hitch. No vehicle modifications required.

2. T-handle's ergonomic grips include a hydraulic breaking system for control on steep terrain.

4. Solid urethane, never-flat tires can nest above the lower frame for additional clearance during transport.

3. The Runner's scissor lift moves up and down easily and smoothly. Strong enough for heavy loads.
